- ✱ Easily mounts in most vehicles
- ✱ Maintenance Mode upon reaching charge complete

### iCHARGE i15VC

The iCHARGE™ i15VC in-vehicle charger by Advanced Charger Technology operates on 12- and 24-volt DC and is ideal for emergency response vehicles and mobile communication units.

The iCHARGE™ i15VC can be hard-wired into the electronics of any vehicle for fast, reliable battery charging that returns your two-way radios to service quickly. The slimmed-down design mounts easily in most vehicles [8"l x 4.5"w x 2"d], and the unit comes complete with adjustable mounting bracket and wiring hardware.

Great for quick, on-site quick recharge at emergencies, clean-up details and special events, the iCHARGE™ i15VC proprietary maintenance mode means your battery is ready when you need it. The iCHARGE™ i15VC supports all ACT adapters for two-way radio batteries.

*" I ordered extra adapters to go with our in-vehicle iCHARGE, and most of the emergency workers in our region know it. Whenever we respond to a situation with other units, everyone comes to us to recharge the batteries, because the iCHARGE is so much quicker and easy to use. " - firefighter*
