"I like the **ACT**ivators because they do what they're advertised to do.

We have a bunch of people swapping batteries in and out, and they were in real bad shape. The **ACT**ivator has done something to them, and now we're getting much longer life out of them that we don't need to replace them.

My budget gets hit for battery purchases. Last year, we spent about \$5000 just on new batteries. I had some guys ordering batteries when the **ACT**ivators arrived, and ended up not ordering them. I've already saved about \$1300. These chargers have eliminated the need to buy new batteries.

People can call me for a reference."
